

<https://ith-gmbh.de/en/job/industrial-mechanic-techn-model-maker-or-similar-qualification/>

Industrial mechanic, technical model maker or similar qualification (m/f/d)

Description

- Completed training as an industrial mechanic or technical model maker
- or completed vocational training in a comparable job profile: e.g. E.g. mechatronics engineer or similar
- Participation in national and international customer projects in the automotive industry: pre-assembly / final assembly / finish of testing and measuring equipment, models, prototypes and devices for automobile production
- Knowledge of measurement technology or the use of measurement systems/software would be advantageous, but not a requirement.

Responsibilities

- Reliability, ability to work in a team and independent way of working
- Enjoy technology and technical processes, good manual skills
- We are also looking for people starting their careers or those just starting out after training, possibly with some initial professional experience
- Welding knowledge in the areas of MAG/TIG welding (for vacation/illness cover) required
